

FOODPACK Sprint

SPRINT represents a cutting-edge advancement in tray sealing technology, offering a compact yet remarkably fast and robust solution. It is the perfect solution for customers who need a space-saving model without compromising on performance. This highly versatile tray sealer adapts to different products, various applications, and all major packaging types, including MAP, GAS FLUSH, and SKIN.

Its high production efficiency, ensured by multiple feeding and transport systems as well as a fully mechanical sealing station, contributes to a significant reduction in consumption, leading to energy savings. Equipped with a quick format change system and a user-friendly interface featuring a 12" monitor and an integrated remote assistance module, the SPRINT is designed for simplicity and ease of use. Additionally, its fully removable conveyor belts make it easy to sanitize.
